Change-of-Control Benefits

The CTO and VP Engineering each receive accelerated vesting of 50 percent of unvested phantom equity if employment is terminated without cause within 12 months after close. Retention agreements replace phantom equity with cash retention and rollover equity.

Non-Compete and Non-Solicitation

Senior management agreements include a 12-month non-solicitation covenant covering customers and employees. Non-compete restrictions are subject to enforceability review and should not be relied upon as the primary retention mechanism.

PMI Note

The top integration risk is engineering retention. Product roadmap continuity depends on retaining at least 80 percent of the workflow automation engineering team through day 180.
